

Condor Aero Club

COVID-19 Disinfecting Recommendations

Summary:

This document is intended to provide recommendations to all Condor members on disinfecting of all Condor Aero Club assets and personal hygiene associated with resuming operations. It's impossible to cover every scenario, so please use your best judgement when in doubt.

Personal:

The CDC continues to stress the importance of practicing PERSONAL preventative measures to help control the spread of Covid-19; to help ensure wellness for ourselves, family members, and members of Condor Aero Club please review the following guidelines for personal hygiene:

- Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer.
- Avoid touching your eyes, nose and mouth with unwashed hands
- Avoid close contact with people who are sick
- If you think you may be sick, stay home and avoid contact with others
- Contact your health care provider for treatment when needed
- Get plenty of sleep, good nutrition and physical activity
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you don't have a tissue, cough or sneeze into your upper sleeve. Either wash or use proper hand sanitizer immediately after.
- We recommend you only fly with family members or household members.
- It is also recommended to fly with a mask to reduce the risk of contamination.

Condor Clubhouse:

Condor will provide hand sanitizer, antibacterial hand soap, and disinfecting spray. Please notify a board member if any of these supplies are missing or running low.

- Please wipe all high-contact surfaces before and after use.
- It is recommended to use personal devices connected to the Clubhouse Wi-Fi network for weather briefings, SkyManager Access, etc. If the clubhouse computer use is necessary, please wipe down the keyboard and mouse before and after use
- After leaving Condor, it is recommended to use hand sanitizer before entering your personal vehicle.

Aircraft & Avionics:

Condor will provide hand sanitizer, and disinfecting spray in each Airplane. Please notify a board member if any of these supplies are missing or running low.

- Only use approved and provided disinfecting supplies. Many cleaners can be harmful to the avionics, interior material and instruments.
- Please wipe all high-contact surfaces before and after use. It should not be assumed the plane was disinfected to one's own standards prior to arriving.
- Care should be taken with personal devices and especially headset mics which by nature are high risk due to the proximity to your mouth and constant adjusting.
- Only use approved and provided touchscreen cleaning cloths when wiping the screens. Screens can be easily damaged and costly to replace. Please report any damage prior to flight, so the board can address the issue with the previous reservation member.
- We recommend avoiding any destination considered to be a current 'Covid-19 Hotspot'.
- Also please take extra time during pre-flight planning to ensure your destination airport current operations (i.e. airspace, local operations/expectations, etc.)

**As a reminder, Condor will provide all necessary cleaning and disinfecting supplies. This is intended to minimize potential damage due to harmful products. Please report any missing or empty supplies. The board will address any 'missing' supplies with the previous reservation member.
